

CLASSROOM PRACTICES & CLASSROOM TECHNOLOGY

These high quality courses focus on instructional strategies, curriculum planning, classroom management, and professional growth. Course content and assessment activities promote job-embedded skills and useful lesson plans.

LEADING EDUCATORS INTO TOMORROW

Course Title

Contact Hours

Description

Classroom
Management

20

Explore the need for a proactive management system and design management tools for the classroom.

Foundations of
Assessment

10

Learn to use classroom assessments to shape teaching and learning. Explore assessments that address the intent of a targeted standard and guide instruction.

Standards-Based
Lesson Planning

20

Examine the Curriculum-Assessment-Instruction (CAI) Model and design a lesson that aligns assessment and instruction to selected standards.

Professional Practices for
Educators

5

Practice decision making skills on issues such as school safety procedures, educational responsibilities, and ethics in this video-based course.

Learning Theory and
Practice

30

Investigate how we learn, remember, and recall information. Evaluate instructional practices that support learners' various needs.

Student Advocacy and
Legal Issues

20

Explore the teacher's role as student advocate. Examine ethical expectations and obligations. Investigate the legal issues of district policies, state statutes, and federal guidelines.

Enhancing the Classroom
with Technology

30

Enrich the classroom experience as use suggested activities and helpful hints that are aligned to the National Educational Technology Standards (NETS).

Planning for Technology
Integration

10

Evaluate your technology skills and develop two technology plans: one for professional growth and one for student achievement.
