MATH COURSES

Online Professional Learning ANYtime, ANYwhere

Math for K-8 Teachers

- Builds concepts, skills, and strategies
- Supports standards-based practice
- Promotes a deeper understanding of math

Beacon Educator has a program of online courses that can be completed from the comfort of your home.

Beacon Educator's math program consists of four in-depth courses that provide close examination of math concepts leading to deep conceptual understanding for students in grades K-8. Each course offers classroom examples for a coherent curriculum that is focused on best practices and research-based instructional strategies including Van de Walle and Webb's Depth of Knowledge. The Standards of Mathematic Practice are explored.

These courses are designed to assist teachers in transitioning to non-traditional pedagogies such as active learning, collaborative/cooperative learning, and the encouragement of student participation and involvement in the learning experience.

| TITLE | POINT | S CONTENT |
|---|-------|--|
| Math for K-8 Teachers: Number Concepts | 24 | Learn strategies for teaching whole numbers, place value, fractions and decimals, and estimation and problem solving. Investigate and practice multiple strategies for problem solving. |
| Math for K-8 Teachers: Number Operations | 20 | Investigate strategies for prociency in number operations, computing fluency, computing with fractions, and computing with decimals. Practice problem solving using number operations to make real-world connections. |
| Math for K-8 Teachers: Space and Shape | 24 | Explore problem solving using two-dimensional and three-dimensional shapes. Identify strategies for teaching accurate measurement, estimation of measurement, and real-world problem solving. |
| Math for K-8 Teachers: Algebraic Thinking | 20 | Make connections between patterns and functions. Explore mathematical models and strategies to increase understanding of quantitative and qualitative relationships, including problem solving using the analysis of change. |
